Instructions for Use:

Clinicians must be familiar with and trained in the administration of intramuscular injections first.Accordingly,the following steps support the proper use:

1.Peel open the small package, take off the protecting cap of needle.

2.Insert the needle into the bottle of medication, draw medication into the barrel.

3.Expel all air bubbles from the barrel, and then do the injection.

4.Depress plunger rod until medication or fluid is fully discharged, the needle automatically retracted.

Features & Benefits:

- Single Use Safety with One-handed Operation
- Simple Operation like Standard Syringes without Extra Steps
- Automatic Needle Retraction after Medication Fully Discharged
- Nonexposed Needle after Automatic Retraction
- Completely Evacuating Medication and Low Dead Space
- Low Dead Space Ensuring Patient Recovery
- Saving Medical Charges for Patients

Wealy® Disposable Automatically Retractable Safety Syringe (with Fixed Needle)
